3. FUNTIONABILITY (The developed system/program)			
3.1	Do all features work correctly?		
3.2	Does the system respond properly?		
3.3	Do buttons perform the correct action?		
3.4	Does the system do what it's purpose to perform?		
3.5	Does the system perform without errors?		

4. USABILITY (The developed system/program)			
4.1	Is the system efficient to use?		
4.2	Can the user use it without training/knowledge?		
4.3	Is the system produce accurate result/output?		
4.4	Can the task have completed easily?		
4.5	Is it easy to correct mistakes?		

5. ACCURACY (The developed system/program)			
5.1	Does the system produce accurate result/output?		
5.2	Does the system meet user needs?		
5.3	Does the coin slot validation correct?		
5.4	Gives desired output?		
5.5	Does the system prevent incorrect inputs?
